EXECUTIVE SUMMARY

What this report focuses on

2C Accounting Pte. Ltd.'s report was generated around Conversion Rate Optimisation, Lead Generation, Website Redesign, rather than as a generic website audit. Across the selected services, the highest-priority problems relate to ready-to-enquire visitors may not know what to do next quickly enough, the site may be relying too heavily on visitors contacting immediately, the homepage hero does not explain the main offer quickly enough. The aim of this report is to show where the business may be losing clarity, trust, search visibility, or lead momentum for the exact services being considered.

Selected services

Conversion Rate Optimisation

Lead Generation

Website Redesign

Top problems across selected services

- Ready-to-enquire visitors may not know what to do next quickly enough
- The site may be relying too heavily on visitors contacting immediately
- The homepage hero does not explain the main offer quickly enough

Recommended priority order

1. Conversion Rate Optimisation: Make the primary enquiry action unmistakable above the fold
2. Lead Generation: Add a softer lead-capture option for visitors not ready to book yet
3. Website Redesign: Rewrite the first screen around the clearest service promise and one main CTA

SERVICE OPPORTUNITY 01

Conversion Rate Optimisation

This section focuses on CTA clarity, friction reduction, trust near conversion points, and clearer next steps.

Severity: HIGH

Confidence: 73/100

Ready-to-enquire visitors may not know what to do next quickly enough

Evidence: Lack of clear call-to-action buttons.

Why it matters: If the next step is unclear, traffic can reach the site but fail to turn into actual enquiries.

Recommended improvement: Introduce one clear primary CTA above the fold and repeat it consistently with action-led wording such as book, enquire, or request.

Severity: HIGH

Confidence: 68/100

The enquiry path may contain more friction than it should

Evidence: Limited mobile optimization.

Why it matters: Long forms, weak contact visibility, or too many choices can cause leads to drop before submission.

Recommended improvement: Shorten forms, reduce competing CTA patterns, and make phone or WhatsApp actions more visible on mobile.

SERVICE OPPORTUNITY 01

Conversion Rate Optimisation (continued)

Priority actions

1. Make the primary enquiry action unmistakable above the fold.
2. Reduce form and navigation friction around conversion points.
3. Add trust cues immediately beside the highest-value CTA.

Expected business impact

Visitors with intent should need less effort to move into contact. The website should convert more interest into trackable enquiries.

SERVICE OPPORTUNITY 02

Lead Generation

This section focuses on lead capture, enquiry pathways, softer conversion offers, and measurable follow-up.

Severity: HIGH

Confidence: 73/100

The site may be relying too heavily on visitors contacting immediately

Evidence: No visible analytics tracking.

Why it matters: Not every interested visitor is ready to book or call on the first visit, so some leads may disappear untracked.

Recommended improvement: Add a consultation request, quote request, or softer lead-capture offer for visitors who want more information first.

Severity: MEDIUM

Confidence: 68/100

There may not be enough visible lead-capture routes for mobile visitors

Evidence: Implement Analytics Tracking.

Why it matters: If visitors need to search for forms or contact options, enquiry volume can suffer.

Recommended improvement: Add a clearer WhatsApp prompt, shorter enquiry form, and stronger CTA placement on the first mobile screen and service sections.

SERVICE OPPORTUNITY 02

Lead Generation (continued)

Priority actions

1. Add a softer lead-capture option for visitors not ready to book yet.
2. Improve mobile visibility for form, phone, and WhatsApp actions.
3. Measure every meaningful lead action so performance can be improved.

Expected business impact

More interested visitors should become trackable leads instead of bouncing. Lead capture becomes easier for visitors who already show intent.

SERVICE OPPORTUNITY 03

Website Redesign

This section focuses on layout, messaging clarity, visual hierarchy, trust, and mobile usability.

Severity: HIGH

Confidence: 73/100

The homepage hero does not explain the main offer quickly enough

Evidence: Limited mobile optimization.

Why it matters: Visitors make a first-judgement decision in seconds. If the core service is vague above the fold, enquiry intent usually drops.

Recommended improvement: Rewrite the hero section with a clearer value proposition, service focus, location relevance, and one dominant primary CTA.

Severity: LOW

Confidence: 68/100

Trust-building proof is not doing enough work near the decision points

Evidence: Insufficient case studies or testimonials.

Why it matters: If credentials, testimonials, or patient proof sit too far from the CTA, the site may feel less credible than alternatives.

Recommended improvement: Move reviews, credentials, before-and-after proof, or awards closer to the main enquiry and booking sections.

SERVICE OPPORTUNITY 03

Website Redesign (continued)

Priority actions

1. Rewrite the first screen around the clearest service promise and one main CTA.
2. Add stronger proof elements near the first major contact point.
3. Tighten mobile spacing and section order so high-intent visitors do not have to search.

Expected business impact

Visitors should understand faster what 2C Accounting Pte. Ltd. does and what action to take next.
The site should feel more credible before visitors are asked to contact or book.

RECOMMENDED NEXT STEPS

Final action plan

1

Conversion Rate Optimisation: Make the primary enquiry action unmistakable above the fold

If the next step is unclear, traffic can reach the site but fail to turn into actual enquiries.

2

Lead Generation: Add a softer lead-capture option for visitors not ready to book yet

Not every interested visitor is ready to book or call on the first visit, so some leads may disappear untracked.

3

Website Redesign: Rewrite the first screen around the clearest service promise and one main CTA

Visitors make a first-judgement decision in seconds. If the core service is vague above the fold, enquiry intent usually drops.
