## EXECUTIVE SUMMARY

# What this report focuses on

AG Singapore's report was generated around Conversion Rate Optimisation, Lead Generation, E-commerce Improvement, rather than as a generic website audit. Across the selected services, the highest-priority problems relate to ready-to-enquire visitors may not know what to do next quickly enough, the site may be relying too heavily on visitors contacting immediately, product decision pages may not be doing enough to create confidence before purchase. The aim of this report is to show where the business may be losing clarity, trust, search visibility, or lead momentum for the exact services being considered.

### Selected services

Conversion Rate Optimisation

Lead Generation

E-commerce Improvement

### Top problems across selected services

- Ready-to-enquire visitors may not know what to do next quickly enough
- The site may be relying too heavily on visitors contacting immediately
- Product decision pages may not be doing enough to create confidence before purchase

### Recommended priority order

1. Conversion Rate Optimisation: Make the primary enquiry action unmistakable above the fold
2. Lead Generation: Add a softer lead-capture option for visitors not ready to book yet
3. E-commerce Improvement: Improve product-page trust and explanation quality

SERVICE OPPORTUNITY 01

# Conversion Rate Optimisation

This section focuses on CTA clarity, friction reduction, trust near conversion points, and clearer next steps.

Severity: HIGH

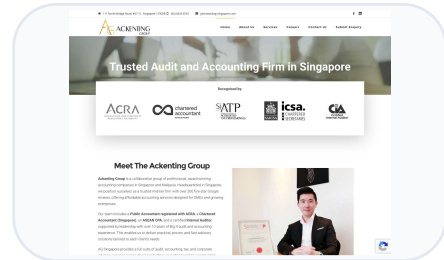

Confidence: 96/100

## Ready-to-enquire visitors may not know what to do next quickly enough

Evidence: No visible trust badges or certifications on the homepage.

Why it matters: If the next step is unclear, traffic can reach the site but fail to turn into actual enquiries.

Recommended improvement: Introduce one clear primary CTA above the fold and repeat it consistently with action-led wording such as book, enquire, or request.

SERVICE OPPORTUNITY 01

# Conversion Rate Optimisation (continued)

Severity: LOW

Confidence: 92/100

## The enquiry path may contain more friction than it should

Evidence: Contact form could be more user-friendly.

Why it matters: Long forms, weak contact visibility, or too many choices can cause leads to drop before submission.

Recommended improvement: Shorten forms, reduce competing CTA patterns, and make phone or WhatsApp actions more visible on mobile.

## Priority actions

1. Make the primary enquiry action unmistakable above the fold.
2. Reduce form and navigation friction around conversion points.
3. Add trust cues immediately beside the highest-value CTA.

## Expected business impact

Visitors with intent should need less effort to move into contact. The website should convert more interest into trackable enquiries.

SERVICE OPPORTUNITY 02

# Lead Generation

This section focuses on lead capture, enquiry pathways, softer conversion offers, and measurable follow-up.

Severity: HIGH

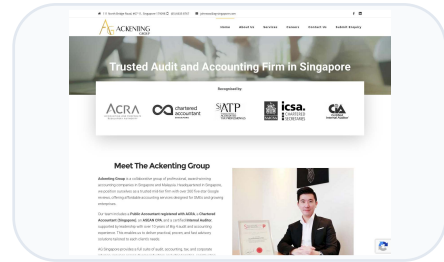

Confidence: 96/100

## The site may be relying too heavily on visitors contacting immediately

Evidence: Contact form could be more user-friendly.

Why it matters: Not every interested visitor is ready to book or call on the first visit, so some leads may disappear untracked.

Recommended improvement: Add a consultation request, quote request, or softer lead-capture offer for visitors who want more information first.

Severity: LOW

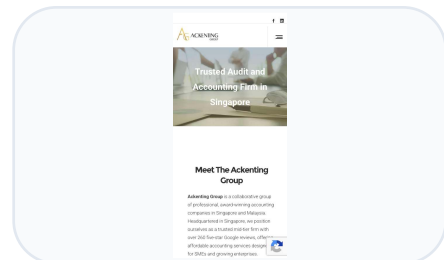

Confidence: 92/100

## There may not be enough visible lead-capture routes for mobile visitors

Evidence: Improve Contact Form Usability.

Why it matters: If visitors need to search for forms or contact options, enquiry volume can suffer.

Recommended improvement: Add a clearer WhatsApp prompt, shorter enquiry form, and stronger CTA placement on the first mobile screen and service sections.

SERVICE OPPORTUNITY 02

# Lead Generation (continued)

## Priority actions

1. Add a softer lead-capture option for visitors not ready to book yet.
2. Improve mobile visibility for form, phone, and WhatsApp actions.
3. Measure every meaningful lead action so performance can be improved.

## Expected business impact

More interested visitors should become trackable leads instead of bouncing. Lead capture becomes easier for visitors who already show intent.

SERVICE OPPORTUNITY 03

# E-commerce Improvement

This section focuses on product trust, purchase flow, checkout friction, and revenue leakage in the buying journey.

Severity: HIGH

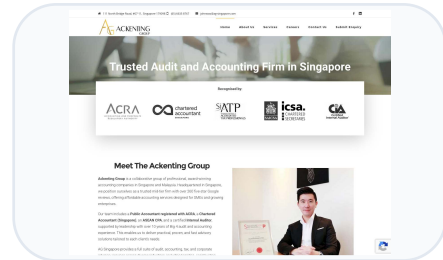

Confidence: 96/100

## Product decision pages may not be doing enough to create confidence before purchase

Evidence: Lack of clear service differentiation.

Why it matters: Weak product structure, proof, or explanation increases abandonment before checkout.

Recommended improvement: Strengthen product pages with better benefit-led descriptions, supporting visuals, proof, and clearer delivery or returns information.

SERVICE OPPORTUNITY 03

# E-commerce Improvement (continued)

Severity: LOW

Confidence: 92/100

## Checkout friction may be costing purchases after intent is already established

Evidence: Limited case studies or client success stories.

Why it matters: Even small barriers near checkout can create meaningful revenue leakage.

Recommended improvement: Simplify the purchase flow, reduce unnecessary steps, and surface reassurance such as payment trust, delivery clarity, and returns information.

## Priority actions

1. Improve product-page trust and explanation quality.
2. Reduce checkout friction around the final decision point.
3. Recover more abandoned purchase journeys with follow-up logic.

## Expected business impact

Shoppers should feel more confident progressing toward checkout. More baskets should turn into completed purchases.

RECOMMENDED NEXT STEPS

# Final action plan

1

## **Conversion Rate Optimisation: Make the primary enquiry action unmistakable above the fold**

If the next step is unclear, traffic can reach the site but fail to turn into actual enquiries.

2

## **Lead Generation: Add a softer lead-capture option for visitors not ready to book yet**

Not every interested visitor is ready to book or call on the first visit, so some leads may disappear untracked.

3

## **E-commerce Improvement: Improve product-page trust and explanation quality**

Weak product structure, proof, or explanation increases abandonment before checkout.

RECOMMENDED NEXT STEPS

## Final action plan (continued)

### Suggested next step

If useful, I can walk you through the highest-priority service opportunities and outline a practical next-step plan on a short call. Ocia Studio can use the selected services in this report as the priority discussion points, rather than presenting a generic website pitch.
