Selected services

Website Redesign

SEO

Lead Generation

Top problems across selected services

- The homepage hero does not explain the main offer quickly enough
- The website may not be sending enough local service relevance signals
- The site may be relying too heavily on visitors contacting immediately

Recommended priority order

1. Website Redesign: Rewrite the first screen around the clearest service promise and one main CTA
2. SEO: Prioritise dedicated pages for the most commercially important services
3. Lead Generation: Add a softer lead-capture option for visitors not ready to book yet

SERVICE OPPORTUNITY 01

Website Redesign

This section focuses on layout, messaging clarity, visual hierarchy, trust, and mobile usability.

Severity: HIGH

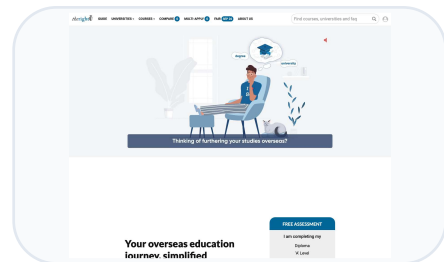

Confidence: 96/100

The homepage hero does not explain the main offer quickly enough

Evidence: Limited case studies or testimonials.

Why it matters: Visitors make a first-judgement decision in seconds. If the core service is vague above the fold, enquiry intent usually drops.

Recommended improvement: Rewrite the hero section with a clearer value proposition, service focus, location relevance, and one dominant primary CTA.

Severity: HIGH

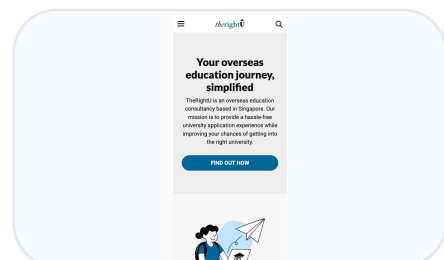

Confidence: 92/100

Trust-building proof is not doing enough work near the decision points

Evidence: CTAs could be more prominent.

Why it matters: If credentials, testimonials, or patient proof sit too far from the CTA, the site may feel less credible than alternatives.

Recommended improvement: Move reviews, credentials, before-and-after proof, or awards closer to the main enquiry and booking sections.

Priority actions

1. Rewrite the first screen around the clearest service promise and one main CTA.
2. Add stronger proof elements near the first major contact point.
3. Tighten mobile spacing and section order so high-intent visitors do not have to search.

Expected business impact

Visitors should understand faster what TheRightU Overseas Education Consultancy (Singapore) does and what action to take next. The site should feel more credible before visitors are asked to contact or book.

SERVICE OPPORTUNITY 02

SEO

This section focuses on search visibility, service relevance, on-page structure, and local SEO.

Severity: HIGH

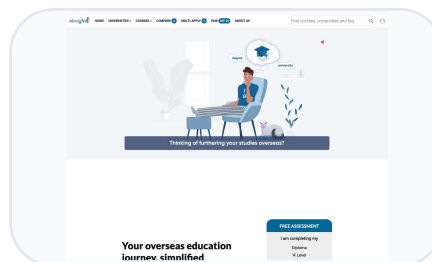

Confidence: 96/100

The website may not be sending enough local service relevance signals

Evidence: SEO optimization needs improvement.

Why it matters: If pages do not clearly combine service intent with location intent, TheRightU Overseas Education Consultancy (Singapore) may miss

searches from nearby prospects. Create or strengthen location-aware service headings, copy, and metadata around the highest-intent service plus location combinations.

Severity: LOW

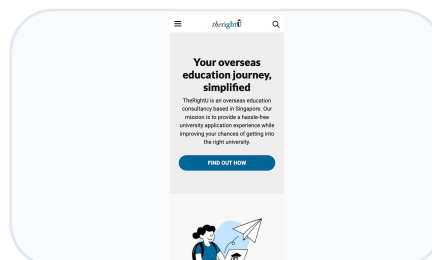

Confidence: 92/100

Important services may not have enough dedicated search-targeted content

Evidence: Optimize for SEO.

Why it matters: Thin or overly generic service content makes it harder to rank for the searches that matter most.

Recommended improvement: Build dedicated service pages with stronger headings, FAQs, internal links, and service-specific copy written around real search intent.

Priority actions

1. Prioritise dedicated pages for the most commercially important services.
2. Improve titles, headings, and local language around service plus location intent.
3. Add FAQ and internal-linking support to strengthen search context.

Expected business impact

Search engines should find it easier to connect TheRightU Overseas Education Consultancy (Singapore) to local service searches. Core services become easier to discover organically and easier for visitors to evaluate.

SERVICE OPPORTUNITY 03

Lead Generation

This section focuses on lead capture, enquiry pathways, softer conversion offers, and measurable follow-up.

Severity: HIGH

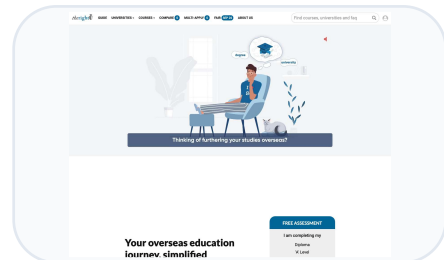

Confidence: 96/100

The site may be relying too heavily on visitors contacting immediately

Evidence: CTAs could be more prominent.

Why it matters: Not every interested visitor is ready to book or call on the first visit, so some leads may disappear untracked.

Recommended improvement: Add a consultation request, quote request, or softer lead-capture offer for visitors who want more information first.

Severity: HIGH

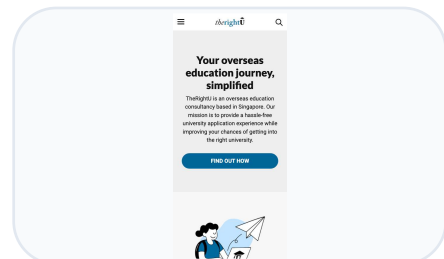

Confidence: 92/100

There may not be enough visible lead-capture routes for mobile visitors

Evidence: Improve CTA Visibility.

Why it matters: If visitors need to search for forms or contact options, enquiry volume can suffer.

Recommended improvement: Add a clearer WhatsApp prompt, shorter enquiry form, and stronger CTA placement on the first mobile screen and service sections.

Priority actions

1. Add a softer lead-capture option for visitors not ready to book yet.
2. Improve mobile visibility for form, phone, and WhatsApp actions.
3. Measure every meaningful lead action so performance can be improved.

Expected business impact

More interested visitors should become trackable leads instead of bouncing. Lead capture becomes easier for visitors who already show intent.

RECOMMENDED NEXT STEPS

Final action plan

1

Website Redesign: Rewrite the first screen around the clearest service promise and one main CTA

Visitors make a first-judgement decision in seconds. If the core service is vague above the fold, enquiry intent usually drops.

2

SEO: Prioritise dedicated pages for the most commercially important services

If pages do not clearly combine service intent with location intent, TheRightU Overseas Education Consultancy (Singapore) may miss searches from nearby prospects.

3

Lead Generation: Add a softer lead-capture option for visitors not ready to book yet

Not every interested visitor is ready to book or call on the first visit, so some leads may disappear untracked.
