Sorry, you have been blocked

You are unable to access enoc.com

Why have I been blocked?

This website is using a security service to protect itself from online attacks. The action you just performed triggered the security solution. There are several actions that could trigger this block including submitting a certain word or phrase, a SQL command or malformed data.

What can I do to resolve this?

You can email the site owner to let them know you were blocked. Please include what you were doing when this page came up and the Cloudflare Ray ID found at the bottom of this page.

**A strategy-first review of trust, visibility,
and enquiry conversion.**

BUSINESS IMPACT FIRST

Executive summary

The website presents Emirates National Oil Co. Pte Ltd as an active business in Professional Services. The main opportunity is to make the next step clearer for visitors who are already interested, while strengthening trust and visibility around the moments that influence enquiries.

CURRENT STRENGTH

Visitors have at least one visible path to contact the business.

BIGGEST OPPORTUNITY

Website access is forbidden due to security measures. This should be translated into a simpler path toward enquiry, booking, or trust.

PRIMARY BUSINESS OBJECTIVE

Convert website visitors into clearer, higher-intent enquiries.

THREE KEY OPPORTUNITIES

- Reduce access friction for legitimate visitors
- Clarify the main enquiry path
- Improve service page depth

POSITIVE FOUNDATION

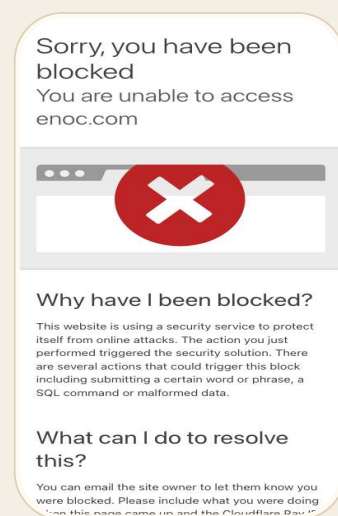

What is already working

The goal is not to make the business feel broken. The current website already has assets that can be sharpened into a stronger commercial journey.

- Visitors have at least one visible path to contact the business.
- Clear service positioning can be sharpened into a stronger conversion asset.
- Visible contact paths can be sharpened into a stronger conversion asset.

SUPPORTING EVIDENCE

- Website access was recorded as forbidden.
- A mobile screenshot is available, so mobile enquiry flow can be reviewed visually.
- A desktop screenshot is available for reviewing first impression and above-the-fold clarity.
- Contact signals found: phone number visible.
- Analytics tracking was not clearly detected, which can make enquiry performance harder to measure.

MOBILE VIEW

PRIORITY 1 - HIGH

Reduce access friction for legitimate visitors

WHY IT MATTERS

A large share of visitors will judge the business from a phone before they ever speak to the team.

EVIDENCE FROM SCAN

Website access is forbidden due to security measures.

BUSINESS IMPACT

The site may attract attention without turning enough of that attention into action.

RECOMMENDED FIX

Tighten the page structure, message hierarchy, and next-step prompts around the highest-intent visitor journey.

EXPECTED OUTCOME

The website feels clearer, more useful, and more commercially focused.

PRIORITY 2 - MEDIUM

Clarify the main enquiry path

WHY IT MATTERS

Visitors with intent need a fast, low-friction path to act while interest is high.

EVIDENCE FROM SCAN

The scan points to an opportunity to improve trust signals.

BUSINESS IMPACT

Interested visitors may leave before booking, calling, or submitting an enquiry.

RECOMMENDED FIX

Add a clear primary call to action, repeat it across key pages, and simplify the enquiry path on mobile.

EXPECTED OUTCOME

More visitors understand exactly how to take the next step.

PRIORITY 3 - MEDIUM

Improve service page depth

WHY IT MATTERS

People searching locally often compare several options quickly, so visibility and clarity directly affect who gets the enquiry.

EVIDENCE FROM SCAN

The scan points to an opportunity to improve service page depth.

BUSINESS IMPACT

The business may miss local demand from people actively searching for this service.

RECOMMENDED FIX

Create or refine high-intent pages around the services, location, and search terms customers actually use.

EXPECTED OUTCOME

The site becomes easier to find and easier to choose in local comparison moments.

MARKET COMPARISON

Competitor insights

Competitor benchmarking can be added in the next audit to compare visibility, trust, and conversion experience.

WHAT THE BENCHMARK WOULD COMPARE

Search visibility, review strength, booking or enquiry clarity, mobile experience, trust proof, and the strength of each competitor's conversion path.

CLEAR NEXT STEPS

Action roadmap

This roadmap translates the audit into practical actions. It avoids a full rebuild-first mindset and focuses on the improvements most likely to affect trust, visibility, and enquiry quality.

IMMEDIATE FIXES

- Clarify the primary call to action around access friction for legitimate visitors.
- Place the most important trust proof closer to the first enquiry point.
- Check mobile pages for obvious next-step friction.

30-DAY IMPROVEMENTS

- Build a focused improvement around the main enquiry path.
- Set up or confirm analytics for form, click, booking, and phone enquiry events.
- Refresh copy on the highest-intent service or location pages.

90-DAY GROWTH OPPORTUNITIES

- Turn service page depth into a repeatable growth system.
- Add deeper proof such as reviews, case studies, portfolio examples, or practitioner credibility.
- Review local visibility and create pages for the most valuable search opportunities.

Suggested next step: book a free website audit with Ocia Studio.

FOR CONTEXT

Supporting signals

These signals support the recommendations, but they are not the story of the report. The story is how the website can create more trust, visibility, and enquiries.

POTENTIAL SERVICE AREAS

- **Branding**
- **Website redesign**
- **SEO**
- **Landing page**
- **Analytics**

DIAGNOSTIC SIGNALS

- Overall internal audit score: 1/10
- Priority level: HOT
- Website status: forbidden
- Contact confidence: 25%
- Design: 1/10
- Mobile: 1/10
